

Business Proposal

Attn: Sales Manager

Dear Sir,

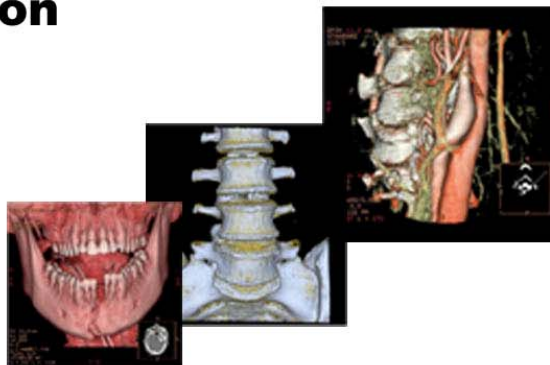

- Our Company "MillenSys" is a leader medical imaging solution provider.
- We produce digital imaging solutions [PACS] to about all types of medical imaging modalities used in the field of radiology and Teleradiology [Ultrasound, Endoscopy, C-ARM, X-ray, CT, MRI, CathLab, ...].
- Our ultrasounds and Endoscopy solutions are very powerful, cost effective, heavy duty and have easy operation as an archiving, processing and printing solutions for these machines.
- Our CathView/OPERA system for CathLab/X-ray and C-ARM machines which provides a complete digital station, archiving DICOM3.0 CD-R unit and backup for the whole digital cine processing unit of the machine, has become the top in the market.
- Our MultiView workstation for multi-modality viewing is very powerful and full of features for image processing including MPR/3D reconstruction for CT and MRI images.
- Our Dicom solutions to convert non-Dicom machines to Dicom are gaining more market share every day due to its easiness and high performance.
- Our stand-alone workstations for all types of medical imaging modalities are the best solutions in the market due to its high performance and cost effectiveness.
- Our Radiology Information System (RIS) solution for both the radiology department is very innovative, very easy to use and very important to automate and manage the workflow inside the department.
- Our complete solutions of PACS/RIS systems are gaining great market share every day.
- We are pioneers in that all our systems are controlled remotely by a wireless remote control to make it easy for the user that he might not use the computer at all.
- All our products are compatible with the most updated medical standards such as Dicom and all our imaging solutions are conforming to European standards for medical devices "CE-mark".

We are seeking business partners all around the world as we can provide cost effective and superior quality third party applications. Please feel free to visit our web site at to view our products and solutions.
