

# Vision Tools MultiView

Full Featured Diagnostic Station  
for PACS/RIS and Beyond

- ☑ FDA 510K
- ☑ CE 93/42/EEC
- ☑ ISO 9001:2000
- ☑ DICOM 3.0
- ☑ HL 7
- ☑ HIPAA

- Single Login for PACS/RIS/Report
- Customized worklist with user profile
- Visual Hanging Protocols
- Rapid operations for large studies
- Works with all types of Modalities
- Display static and dynamic studies
- Oblique, Bi-Oblique and Curved MPR/MIP
- Slice Locator / Pilot Image for CT/MRI
- Printing on DICOM and A4 Printers
- Publishing CD/DVD with built-in Viewer
- Statistical Analysis with Charts
- Radiology and Cardiology Measurements
- Image Processing and Annotations

### Added Options

- 3D Reconstruction and Fly-Through
- Template and Structured Reporting
- Voice Dictation and Speech Recognition
- View RIS Scheduling and Orders
- Teleradiology / Web Distribution.

### **Diagnostic Station for PACS/RIS**

- Single login to PACS/RIS and report
- Rapid operations for large studies
- Roaming user profile
- Visual hanging protocols
- Built in MPR, MIP, 3D reconstruction tools
- Display dynamic Studies in 4D mode
- Generate slice locator and pilot images for CT/MRI
- One click for RIS, reporting and dictation
- Viewing of static and dynamic studies
- Archive studies on CD/DVD with built in Viewer.

### **Diagnostic Station for Cardiology**

- View all Echo, Cathlab, Cardiac CT Studies
- Scan ECG and other waveforms printouts
- User profile and visual hanging protocols
- Structured reporting and Dictation
- Rapid Operations for Large Studies
- Viewing of Static and Dynamic Studies
- QCA and QLVA analysis for cathlab studies
- Archive studies on CD/DVD with built in Viewer.
- Optional MPR, MIP and 3D for cardiac CT.

### **Powerful 2D / 3D Visualization Station**

- Rapid Operations for Large Studies
- MPR in orthogonal, oblique and curved directions
- Display dynamic Studies in 4D mode
- 2D and 3D MIP processing
- Virtual Colonography and Fly-through navigation
- Bone removal and organ segmentation
- Artery and coronary segmentation
- Visual Hanging Protocols
- Generate slice locator and pilot images for CT/MRI
- Print studies on A4 papers and films
- Save generated movies on CD.

### **MiniPACS in One Station**

- Best for MiniPACS and small scale environment
- PACS server and viewer in same hardware
- Multi-user operation with user profile
- Visual Hanging Protocols
- Archive studies on CD/DVD with built in Viewer.
- Rapid Operations for Large Studies
- Viewing Static and Dynamic Studies
- Simple reporting with voice dictation features
- Print studies on A4 papers and films
- Optional MPR, MIP, 3D reconstruction Tools
