MiClinic

Web based EHR / EMR Solution

MiClinic is a professional workflow and productivity improvement application for any polyclinic or medical practice, it can be considered as an enterprise practice management system as well as an EMR solution. MiClinic handles patients scheduling, admittance, billing, examination producers and results, prescriptions, reporting, accounting and material management as well as a full back-office financial management including financial reports, general ledger, account receivables, account payables, supply chain management and human resource management.

Why MiClinic ?

It is a total management solution for the whole polyclinic or medical practice from clinical, front-office billing to financial back-office.

It is Web based and support multi-lingual that can work in a cloud and in-door.

It has a single node web administrator for all the solution.

it works with any device , PC , tablet , smart phones

It Supports both centralized and decentralized environments

It has a seamless Integration with MILLENSYS PACS "Vision Tools Workspace" .

It can integrate with any other PACS using HL7 standards.

In a hospital, it can work without HIS (accept direct order from referrals)

MILLENSYS provides remote support around the clock from anywhere
