MiAnalytics

**Data Visualization and Business Intelligence**

Why MiAnalytics ?

MILLENSYS Analytics is a web based business intelligence software that allows users to create dashboards, visual analyses and reports using data from multiple sources.

from anywhere and at anytime you can access your data, it doesn't matter if you are using a PC, notebook, tablet, IPAD or any smart phone.

The software can run on as an (on-premise) to keep the data private without public accessibility , or in cloud to be able to utilize the data from anywhere and decrease the CAPEX needed for such applications.

Visualize complex data from anywhere
Improve analysis and decisions
Manage more in less time
